

## North Conway, NH (NCON3) Monthly Weather Summary

### April 2022

#### **Summary**

April 2022 featured frequently wet and cool conditions, with maximum temperatures averaging nearly 2 degrees F cooler than normal, while minimum temperatures still managed to average 2 degrees above normal. Daily maximum temperatures struggled to reach the 60F mark throughout the month, with a monthly maximum of 63F reached on two different days. By comparison, 70F was reached on one day in March of 2022. On the flipside, daily minimum temperatures dipped below the freezing mark on six days, but those temperatures still managed to average warmer than the monthly minimum average temperature of 31.3F.

Precipitation was recorded on 18 days out of the month, with six of those days featuring more than a quarter of an inch falling. Frozen precipitation was observed on four days during the month, though just the 18<sup>th</sup>-19<sup>th</sup> saw snowfall measuring more than a trace. The 0.8 inches that fell on the 18<sup>th</sup>-19<sup>th</sup> set a new daily snowfall record.

Snowfall for the season now stands at 62.0 inches, which is 22.0 inches lower than normal, and likely to be the final deficit for the snow season that runs from July to June.
