

North Conway, NH (NCON3) Monthly Weather Summary

November 2021

Summary

November 2021 was warmer and drier than normal. Temperatures rose above seasonable levels near the beginning and middle of the month, with the coldest outbreak of air observed at month's end. Temperatures ranged from a maximum of 68F at midmonth, to a minimum of 19F on the morning of the 30th. All told, daily maximum temperatures were more than 2F above normal, with daily minimum temperatures right at normal levels.

Precipitation and snowfall were both lower than normal, with the bulk of the precipitation falling between the 10th and 15th. The first snow of the season was recorded on the morning of the 16th, and would be the first of six different days throughout the month tallying snowfall. None of these six days saw snowfall accumulate to more than a trace.

Snowfall for the season is just a trace, falling 4.8 inches below normal. Precipitation for the calendar year now stands at 37.39 inches, which is 8.27 inches drier than normal.
