North Conway, NH (NCON3) Monthly Weather Summary

November 2022

Summary

November 2022 was a story of two different months as the first half featured unseasonably warm conditions, followed by a colder, snowier and wetter second half. On six days during the month, daily maximum temperature reached the 70F mark, which is a full 24F degrees warmer than the November average. During one exceptional 24-hour observation day on the 6th to 7th, temperatures ranged from maximum of 73F and minimum of 61F. This minimum temperature represents a daily departure of 34F warmer than the normal daily minimum temperature in November at 27F. Maximum daily temperature for the month averaged nearly 7F degrees warmer than normal, with the mean temperature for the month 41.4F setting a new mark for the warmest November on record (station records go back to 1959). The previous warmest November was 40.9F in 1999.

Conditions shifted toward decidedly cooler conditions by the 15th, with daily maximum temperatures averaging cooler than normal in the upper 30Fs and lower 40Fs. The first measurable snow of the season was observed on the 15th-16th with 2.1 inches falling. Temperatures moderated through the remainder of the month, with precipitation totaling a slightly lower than normal 3.74 inches.
